Definition

- A cloud-based Human Resources Information System (HRIS).
- Designed for small to mid-sized businesses to simplify HR operations.
- Covers the entire employee lifecycle: recruiting → onboarding → data → performance → offboarding.

Key Features

- Centralized employee database.
- Hiring & onboarding tools with templates and an ATS.
- Performance management, goal tracking, and feedback.
- Time-off management and automated accruals.
- Payroll (U.S.), benefits tracking, and compliance tools.
- Reporting & analytics with customizable dashboards.

Platform Strengths

- Extremely easy to use and intuitive for both HR teams and employees.
- 150+ integrations in a unified HR ecosystem.
- Embedded AI-powered insights for smarter decisions.
- Scales with company growth; modular and adaptable.

Benefits for Organizations

- Streamlines HR processes and reduces admin time.
- Centralizes data → fewer errors and better compliance.
- Improves employee experience with self-service tools.
- Allows HR teams to focus on strategic work through automation.
